COMUNICATO n. 880 del 27/04/2020

From today small loosens to the lockdown

57 new Coronavirus infections were recorded yesterday in Trentino, 19 of which in nursing homes. 4 minors, between 13 and 16 years old, non-serious, are in home care. 5 deaths recorded, of which 3 in nursing homes. People in ICU dropped to 24. A total of 1347 swabs were administered. The percentage of positives is 4%. The total number of people infected since the beginning of the epidemic stands at 4528 units, of which 1240 total within nursing homes. Today, most of the measures contained in the new ordinance of President Maurizio Fugatti, adopted on Saturday, enter into force.

These are loosening measures that allow, among other things, access to some stores (including markets if authorized by the Municipality), the use of bike paths to go to work, both parents with minor children walking in the vicinity of their house. The measure on purchasing take away food, in restaurants, pizzerias or ice cream shops of one's own municipality (or the neighboring one if the municipality of residence is not equipped with this shop) will come into force on Wednesday. Mandatory telephone reservation, to avoid gatherings.
Based on what was announced yesterday by the Prime Minister Giuseppe Conte, with the start of Phase 2, or from next May 4, those who have been forced to spend this closing period away from their house will be allowed to return to their homes.
