COMUNICATO n. 991 del 09/05/2020

New openings for sporting activities, grocery shopping and second homes

Yesterday in Trentino one death and two new infections presenting symptoms that appeared within the last 5 days (according to the new national classification) were recorded. In addition, 28 other cases tested positive to serological tests. 1602 swabs were administered. The President of the Province, Maurizio Fugatti, explained the new ordinance, in force from today. It provides for some important novelties to the freedom of movement, which concern sports activities, grocery shopping and second homes in particular.

First of all, individual sport or physical activity outdoors will be allowed in the whole territory of the Province and, more generally, of the Trentino-Alto Adige Region. It is still mandatory to maintain the interpersonal distance of at least two meters for the sporting activity and at least a meter for any other activity. Individual sport is also allowed at sports facilities or centers, where specific prescriptions and guidelines are in force.
In order to do sports or physical activities outdoors, including reaching sports facilities or centers, it is also allowed to travel by public or private transport. Not completely self-sufficient people and minors are allowed to do sports or motor activities with an accompanying person.
As for the second homes, the president announced that it will be possible to reach second homes and stay there for more days, with one's family members throughout the provincial and regional territory. Second homes also include campers, caravans or boats. The other important change concerns grocery shopping. From today it will be possible to go grocery shopping at stores throughout the provincial and regional territory. The same applies to food takeaway business. Finally, concerning vegetable gardens and farmland, It is allowed to reach them freely and not only once a day with one's family members. Visits to cemeteries, throughout the region, are also considered among the permitted movements.
